

Paul KOMBETTO

Prospective Research Master's Candidate in Management Science and Information Systems

Cotonou, Benin, West Africa | +229 01-63-42-04-44 | paulkombetto1@gmail.com | LinkedIn: Paul KOMBETTO

PROFILE

Beninese engineering graduate in Embedded Systems and IoT, with strong non-technical skills in communication, marketing, sales, and leadership. Preparing a research-track Master's in Management Science and Information Systems, aiming for an academic and entrepreneurial career.

LANGUAGES

French: Native (C1)

English: Upper-Intermediate (B2)

TECHNICAL SKILLS

- Python, C/C++, Java
- Machine Learning & Computer Vision
- Embedded Systems: Arduino, ESP32
- IoT Protocols & Sensor Integration
- Data Collection & Analysis
- MS Office, Google Suite, Canva, Trello, Slack

NON-TECHNICAL SKILLS

- Project ownership & delivery
- Team leadership & coordination
- Technical-to-business communication
- Growth & digital marketing
- Sales experience
- Adaptability & resilience
- Public speaking

AWARDS & DISTINCTIONS

- Top 10 Best Participant: EEIA 2024, Fondation Vallet
- 2nd Prize: DICDAY Challenge 2024
- 3rd Prize: Benin Multimodal Hackathon AI, ASIN Benin & lablab.ai, 2024
- Hubi & Vinciane North Benin Scholarship, 2022

HOBBIES

- Football
- Music
- Travel

EDUCATION

Bachelor of Science in Embedded Systems and IoT (Average Score: 15.21/20, 76%)

University of Abomey-Calavi, Institute of Training and Research in Computer Science (IFRI-UAC), Benin ifri-uac.bj

2022 – 2025

- Final thesis: sole designer of an IoT Automated Monitoring Greenhouse System
- Coursework: Statistics, VHDL/FPGA, Microcontrollers, RTOS, IoT & Wireless Protocols, C/C++, Python, Java, Project Management, Communication

PROFESSIONAL EXPERIENCE

Growth Management Intern | KAWA SERVICES, Cotonou, Benin

July 2026 – Present

- Use AI tools, A/B testing, and social media to design growth initiatives with measurable impact
- Apply advanced prospecting and digital marketing to identify and convert new business opportunities

AI & Tech Applied Growth Intern | Tout-Talent, Cotonou, Benin

March – June 2025

- Analyzed user and product data to identify growth and engagement opportunities
- Translated technical solutions into terms understood by non-technical stakeholders

Embedded Systems and AI Intern | Benin Excellence, Abomey-Calavi, Benin

July – August 2024

- Prototyped embedded systems with Arduino and Python, from wiring to functional testing
- Implemented machine learning algorithms to solve applied engineering problems

KEY PROJECTS

IoT Automated Monitoring Greenhouse System | Bachelor's Thesis, IFRI-UAC

August – November 2025

- Built a full-stack IoT system automating greenhouse climate control using ESP32 and sensors
- Sole owner end-to-end: requirements, firmware (C/C++), Wi-Fi dashboard, system integration
- Motivated by growing up in a farming family, applying low-cost IoT to smallholder agriculture

AI-Powered Plant Disease Detection Mobile Application | AI/IoT Club, IFRI-UAC

March – June 2023 (team project)

- Co-developed a Flutter app integrating a YOLO computer vision model for disease detection
- Contributed to data collection/preprocessing and model integration into the front-end
- Presented the prototype to peers and faculty as a proof-of-concept for agri-tech diagnostics

VOLUNTEERING & LEADERSHIP

Vice-President of Public Relations | Toastmasters Gavel Club Ganiatou Sambaou, IFRI-UAC

January – October 2025

- Managed media communications and public relations on behalf of the club
- Coordinated internal communication and logistics between members and the executive office
- Practiced and honed public speaking and leadership skills through regular club activities

Partnerships and Youth Engagement Assistant | AIESEC in Benin

February 2024 – January 2025

- Led partner onboarding initiatives, engaging organizations to support youth programs
- Coordinated teams executing youth engagement projects across local communities
- Assisted in partnerships development, strengthening ties with external stakeholders
